*File  
Marched Sample #31*

Gentlemen:

The enclosed, updated report replaces the draft mailed March 9, 1989. During the draft's 30 day review period, Philip Morris requested that seven of their brands; Alpine KFMSP, Benson & Hedges 100's 100FHP, Benson & Hedges 100's 100FMHP, Benson & Hedges 100's 100FSP, Benson & Hedges 100's 100FMSP, Marlboro KFMSP, Virginia Slims Lights 120's 120FHP, Virginia Slims Lights 120's 120FMHP; be retested.

The new values for these brands are the ones now listed in the report. No significant changes occurred except for the rounded CO values of Alpine KFMSP, Benson & Hedges 100FMHP, and Marlboro KFMSP.

Updated files containing TITL results on a 360K DSDD disk, readable on any IBM compatible machine, are also included. Two files are in Lotus .wk1 format. One contains TPM, Water, and Puff Counts in addition to Tar, Nicotine, and CO; the other contains the rounded Tar, Nicotine, and CO values. These should be readable by most programs; however, the same information is also provided in ASCII files (with a .csv extension) with commas delimiting the data fields.

Yours truly,

*William L. Steele*
